

Energy, healthcare, and applied AI — under *one disciplined firm.*

Babylon Consulting transacts steam and gas turbines as a direct principal, and advises across healthcare operations and artificial intelligence. One standard of discretion and execution, applied wherever the work demands it.

FIRM OVERVIEW

A principal in the market.

Babylon Consulting LLC is a privately held firm headquartered in the United States and engaged worldwide. Our core business is the acquisition and sale of steam and gas turbines for power producers, industrial operators, and project developers. Around that core we run two focused advisory practices — healthcare and AI & data — measured by outcomes delivered, not reports issued.

01

Oil · Gas · Energy

Steam & gas turbine acquisition and sale — new, surplus, and pre-owned — as a direct principal.

02

Healthcare

Operational and growth advisory for medical and specialty practices and provider groups.

03

AI & Data

AI strategy, workflow automation, and data architecture built to run in production.

BY DEFAULT

— WHERE WE OPERATE

Three sectors. One standard of execution.

Oil · Gas · Energy

DIRECT PRINCIPAL

We buy and sell steam and gas turbines on our own account — principal to principal, with clear title, verified condition, and certainty of delivery. Heavy-duty frame and aeroderivative gas turbines, condensing and back-pressure steam turbines, and complete generating packages.

- STEAM & GAS TURBINES
- NEW · SURPLUS · PRE-OWNED
- 50 HZ & 60 HZ
- COMPLETE POWER PACKAGES

Healthcare

ADVISORY PRACTICE

Hands-on operational and growth advisory for medical and specialty practices: workflow and intake redesign, staffing models, patient experience, and the practice-management and digital systems underneath them.

- OPERATIONS & WORKFLOW
- GROWTH & RETENTION
- SYSTEMS & TECHNOLOGY

AI & Data

ADVISORY PRACTICE

AI strategy, workflow automation, and data architecture for organizations modernizing how they operate — delivered as systems that run in production, with humans kept in the loop where judgment matters.

- AI STRATEGY
- WORKFLOW AUTOMATION
- DATA ARCHITECTURE

— CONFIDENTIAL ENGAGEMENTS

Active NDAs across U.S. data-center infrastructure.

Babylon Consulting maintains active non-disclosure agreements across multiple engagements in the United States, principally tied to data-center developments and the power systems that serve them. Counterparties and project specifics are withheld in accordance with those agreements.

The U.S. data-center buildout is driving sustained demand for on-site and grid generation — the steam and gas turbine capacity Babylon sources and transacts as principal.
